

Attachment 1 – List of deviations from the Price List

1. A deviation from the Price list is determined, consisting in honouring in the Transport GZM urban transport the tickets issued by the KŚ and POLREGIO due to a long-term reconstruction of the railway junction in Katowice. Passengers holding tickets issued by the KŚ or POLREGIO, in accordance with its validity period and scope of validity, can travel by the Transport GZM urban transport, provided that:
 - a) the route of travel specified in the ticket covers only the area included in the transport organisation changes, which result from the reconstruction of the railway junction in Katowice;
 - b) this is relation-free ticket (e.g., a network, tourist ticket or REGIOkarnet);
 - c) this is a ticket issued for travelling by the trains operated by the KŚ or POLREGIO in a shortened relation, i.e., from/to the station, to which the train travels were shortened, in accordance with the current list of changes in the trains' operation, displayed on the KŚ or POLREGIO website.
2. A deviation from the Price List is determined, consisting in the introduction of free rides on substitute lines started due to the closing of the footbridge between Pośpiecha and Pukowca streets in Katowice (line No Z-7) and due to the closing of the flyover in Dobrego Urobku street in Katowice (line No Z-38).
3. Long-term tickets (comprising the municipality of Sosnowiec by their validity scope) entitle, during their validity period, during the pilot project duration, to travel by the night transport organised by the municipality of Sosnowiec and the Sosnowiecka Sieć Szerokopasmowa Sp. z o.o. (Sosnowiec Broad Band Network, Ltd.). During rides by the night transport the transport Regulations of the carrier are applicable, which determine detailed conditions of the travellers' service, persons check-in and transport.
